NAVIGATING THE SITE

Welcome to the "NEW" Clinical Engineering Consultants, INC. Website. It has been our mission and goal to create a new, more user friendly experience during your visit. As you will immediately notice, there are no links along the side of the page. We have integrated the links to the other site pages into the pictures at the top of the page. To open a new page, simply click on the pictures. Rolling your mouse over each individual picture will tell you which page you will be directed to next.

NAVIGATING HYPERLINKS / CATALOG

Along with new site layout, we have also made drastic changes to our products catalog and hyperlink sections of the website. When selecting items from the drop down boxes on the Products page, you will be redirected to an adobe portfolio style catalog. Please make sure that pop-ups are enabled for this site to get the best user experience available.

For further assistance, or if you have any questions, please feel free to contact us. Thank you.
